

# Pompom flowers

## BABYCCINO KIDS

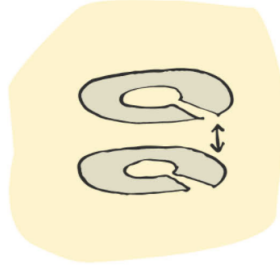

23RD APRIL 2020

There are two easy ways to make pompoms. For bigger pompoms, we cut out two times two circles of thin cardboard. You can just use a cup and an egg cup for example, to determine the shape. Layer both cardboard circles, cut through them so they have an opening to the centre, and start winding the thread around.

## Bigger pompoms:

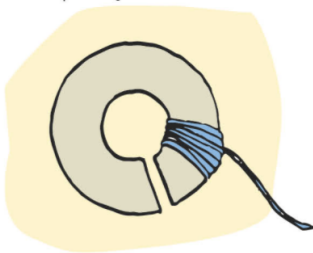

1. Trace the outer circle with a cup. The inner one with an eggcup for example. Cut through them so they have an opening to the centre.

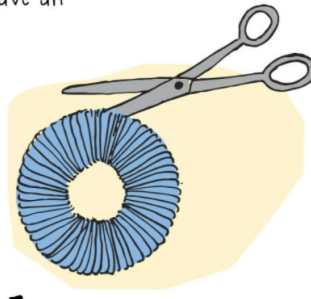

2. Layer both cardboard circles.

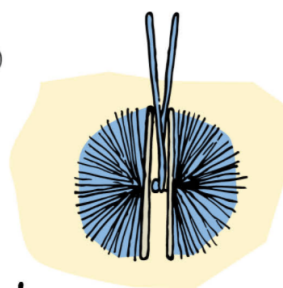

3. Get some nice wool.

4. Start winding the thread around. You can use different colours for your pompoms. Just cut the first colour and start winding with the second one.

5. Cut through the sides, in between the two layers of cardboard.

6. Secure the pompom by knotting a string of yarn around the middle, in between the two cardboards. Get rid of the cardboard.

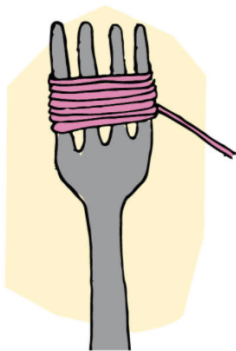

7. You can leave the ends of the yarn you used to knot the pompom together.

## For smaller pompoms

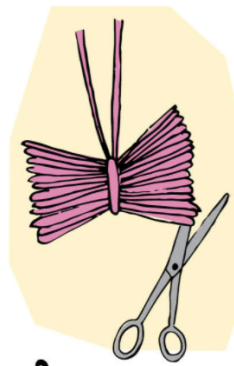

### Smaller pompoms:

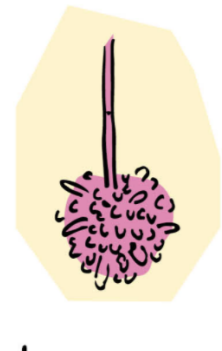

1. Wind some thread around the fork.

2. Then secure it by knotting around the thread through the middle tines.

3. Cut the edges.

4. TADAAAA!!!

To make pompom flowers, glue the pompoms to the pointy side of a skewer using hot glue. To give the pompom flowers different heights, cut off a part of some of the skewers with a hand pruner.
